Please be aware that I am strongly in favor of allowing XM radio (a for pay service) to provide Instant Traffic and Weather reports. This is valuable to me and should be my choice. No one is forcing or coercing me to listen to one venue or another. If I choose to listen to AM or FM I am free to do so. Likewise I expect my XM provider to give me as much value for my money as possible. For the NAB to act like this is some sort of unfair advantage is to listen to a group howling with their heads in the sand. The market will respond if they provide what people want to hear.

Please stay out of micromanaging the free market.

David A. Nelson
